

SA Summer of Speed 2007/2008

Heat #2

2007 Dec 09 – Long Distance Marathon. Sugars Beach, Murray Mouth (Hindmarsh Island side)

Race day two of the **KA Sail SA Summer of Speed** was held at a very windy Murray Mouth. The original format was to be a giant slalom race, but this was quickly scrapped in favour of outright speed sailing along the 500m speed strip in super-flat water and winds of around 20-25 knots. The winds started out as W/SW, but quickly swung to the SW and tightened the course. The Murray Mouth is a constantly changing series of sand bars and with ongoing dredging work, it is always providing different and challenging conditions – sometimes favorable.....sometimes not. Yesterday was AWESOME! We had a good turn-out of sailors and everyone was loving sailing in a new location and with perfectly flat water and amazing conditions for speed. I'm sure we'll all be keeping an eye on the weather charts now for big W/SW'ly to SE'ly winds. This location has the potential to push all of our PB's through the roof!

Thanks to **KA Sail** for their generous support of this race series. – Chris Dimond

Results: Page 2

- Newly allocated sail numbers – Recent AWA memberships will receive sail numbers before January's event.
- Competitors that miss a day's racing or do not post a result received points based on the total numbers of competitors in the competition at that time.
- Next event – January 25 + 26 at Lake George, Beachport.

Organisers and contact details
